

MC110 PRO/MC120 PRO pH Monitors

PRO pH monitor allows you to continuously monitor pH values directly in your reservoir. Features include: user selectable set point, visual LED alarm when values go above or below the set point and manual calibration.

Each monitor is powered by a 12 VDC adapter and is ideal for applications such as Hydroponics and Aquarium.

The pH monitors are very simple to operate:

1. Hang your monitor above the reservoir;
2. Connect the adapter to the meter and plug in the power supply (make sure that your power supply is in a safe area away from the water);
3. Immerse 2/3 of the electrode in the solution;
4. The probe can now remain there permanently.

The monitors are supplied complete with a MA911B/2 pH electrode. Each monitor comes complete with a 12 VDC adapter and calibration solution.
