

hPa

Differential pressure measuring instrument

testo 526 - Pressure measurement for all pressure ranges

Temperature-compensated differential pressure sensor 0 to 2000 hPa in instrument

Additional 2 probe inputs for the connection of further probes for the measurement of pressure and temperature

Direct zeroing of display value from pressure probes

Display of Hold-, max. and min. values

Easy data storage by measurement site as well as analysis, archiving and documentation via optional PC software

Leakage rate measurement (pressure drop per time)

Testing of pressure drop in containers, pipelines etc.

testo 526-1/-2 is a highly precise differential pressure measurng instruemnt with an internal sensor. This has a measuring range from 0 to 2000 hPa. The instrument is optimally suited to pressure checks in sensitive industrial processes, and is available in 2 accuracy classes. - testo 526-1: accuracy 0.1 % of final value - testo 526-2: accuracy 0.05 % of final value The testo 526-1/-2 additionally has two probe inputs for the

connection of further probes for the measurement of pressure and temperature. A large selection of probes is available for this purpose.

Specially for the purposes of tightness tests on containers, uninterrrupted recording is possible via the test menu in testo 526-1 and testo 526-2. The subsequent processing of the measurement data via software or printout via the printer allow the documentation of the pressure test.

Differential pressure measuring instrument

testo 526-1

testo 526-1 (0 to 2000hPa 0.1% acc') incl. battery and calibration protocol

Part no. 0560 5280

testo 526-1 with internal sensor 0 to 2000 hPa / 0.1%

0 to 2000 nPa / 0.1%

testo 526 is the ideal differential pressure meter for industrial applications. Processes can be accurately measured and monitored with an accuracy of 0.1% of the full-scale value.

testo 526-2

testo 526-2 (0 to 2000hPa 0.05% acc), fast coupling connection, battery and calibration protocol included

Part no. 0560 5281

testo 526-2 with highly accurate internal sensor 0 to 2000 hPa, 0.05\%

testo 526 is the ideal differential pressure meter for sensitive industrial applications. Critical processes can be efficiently measured and monitored at an accuracy of up to 0.05% of the full-scale value.

Advantages testo 526-1 and testo 526-2

- Built-in differential pressure probe
- 2 user defined probe sockets for pressure and temperature
- Wide selection of probes
- Documentation on site

- Easy data management via PC
- 2 line display with text menu guide
- Display light
- Mains socket/fast battery recharging
- Fast-action coupling connections M8x0.5

Easy data management via PC

Inspection of transmitters with 4 to 20 mA interface

2 user defined probe sockets for pressure and temperature

Further advantages testo 526-1 and testo 526-2

Wide selection of probes

The differential pressure sensor is built into testo 526. Up to two additional probes can be connected via user-defined probe sockets.

- Differential pressure probes to 2000 hPa
- Absolute pressure probes to 2000 hPa
- Relative pressure probes to 400 bar
- Temperature probes from -200 to +1250 °C
- Probes for measuring current/voltage

Documentation on site

- Measurement protocols can be printed on site. No awkward cables required on account of the infrared interface.
- Long-term legible thermal paper ensures that measurement data documentation can be stored for up to 10 years.

Easy data management via PC

- The saved measurement data can be easily analysed and processed using the software available.
- Readings are taken by the instrument and can be depicted online by the software.
- Pressure drops can be protocolled online in cycles of 0.05 seconds in the Fast Measurement menu. Since, in most cases, pressure drops cannot be predicted, a rule can be defined via the trigger function; the pressure drops are then filtered out and stored separately for the user in indexed pages.

Long-term monitoring made easy

- Measurement data can be saved separately or as a measurement series. The measurement rate (0.04 seconds, 1 second to 24 hours) and the number of values to be saved are freely selectable. The maximum memory size is 25000 readings.
- The readings are saved under separate names for the sites (max. 99 sites) with retracing guarantee.
- Online measurement for large quantities of data can be activated via PC.

Technical data

General technical data testo 526-1/-2

-20 to +70 °C
0 to +50 °C
Battery/Rechargeable battery,Mains unit 12 V
9 V (6LR61)
Continuous operation w/ internal pressure sensor: 30 h With rech. battery: 10 h With carbon battery: 18 h
300 g
219 x 68 x 50 mm
ABS
100 kB (corresponds to approx. 25000 readings)

Connection	Hose: inner Ø 4 mm outer Ø 6 mm
Display	LCD display with symbol, 7 segment display and point matrix
Updating rate in display	2x per second, in fast measurement 4x per second
Measuring rate	from 0.04 seconds
PC	RS232 interface
Other features	Mains connection and battery recharging in instrument Automatic recognition of all connected probes 9 measurement units selectable: mbar, hPa, bar, Pa, kPa, inH ₂ O, mmH ₂ O, torr, psi
Warranty	2 years

Sensor types
